Documentation

Here you can find the Apptha Photo Gallery(Mac Dock Effect) Documentation table of contents. We are in the process of expanding the features of our product. If you feel this list is missing something critical, please feel free to contact Us, so that we can continue to make improvements.

Overview

- 1.1 Welcome to Apptha Photo Gallery(Mac Dock Effect)
- 1.2 Apptha Photo Gallery(Mac Dock Effect) Requirements.
- 1.3 Installing Apptha Photo Gallery(Mac Dock Effect)

Configure Overview

- 2.1 Configuring Apptha Photo Gallery(Mac Dock Effect)

1.1) Welcome to Apptha Photo Gallery (Mac Dock Effect)

Thank you for choosing Apptha Photo Gallery(Mac Dock Effect) component for your Joomla CMS.

One big reason for its success is regular updates and features. Customer satisfaction is our top priority.

We hope you find the process smooth and can then look forward to tailor Apptha Photo Gallery(Mac Dock Effect) to your own specific requirements.

This component gives you a new look for viewing your images. We have integrated Mac Dock effect and smooth gallery slideshow into this component.

What is 'Mac Effect'?

Mac effect gives a classy look to your photos. When the mouse or pointer is rolled over the photos, the photo which is in contact with the pointer gets blown up and brought to the fore whereas the rest of the photos go to the back.

What is Smooth Gallery slideshow?

The 'Mac effect' component embeds Smooth Gallery into it. This is a slideshow which can either automatically show the next image (after a changeable amount of time) or the user can switch to the next and previous image. The best part of this slideshow is that thumbnails are generated and user can enable it if they want to view a particular image.

1.2) Apptha Gallery (Mac Dock Effect) Requirements

To successfully install and use AppthaPhoto Gallery(Mac Dock Effect) you must have a fully operational web server (Apache is the optimum) with Joomla installed.

Apptha Photo Gallery(Mac Dock Effect) has been tested and resulted desirably on many variants within the main three OS for Windows, Linux with Joomla installed. It might work well on other platforms too.

1.3) Installing Apptha Photo Gallery (Mac Dock Effect)

Where to get Apptha Photo Gallery(Mac Dock Effect)?

2.1) Configuring Apptha Photo Gallery (Mac Dock Effect)

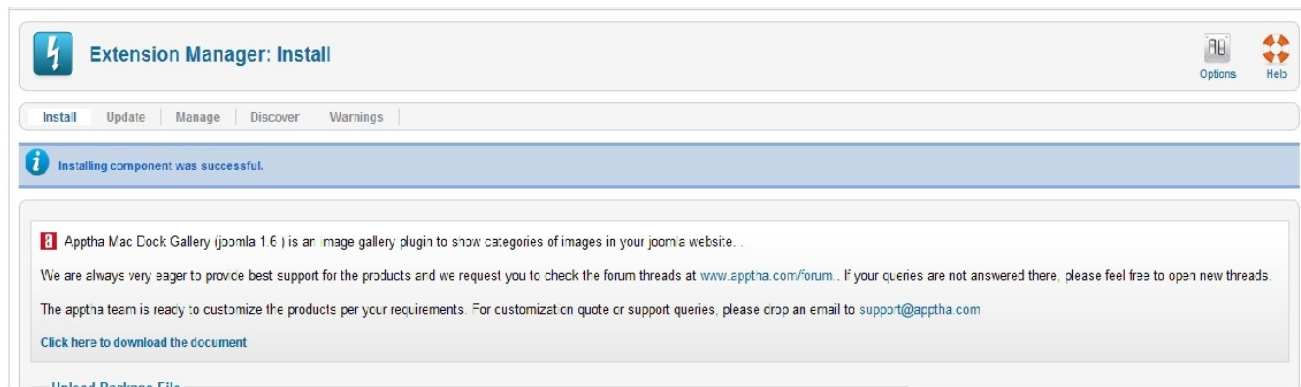

Installing the downloaded files is quite simple.

Login with your Joomla website Administration area

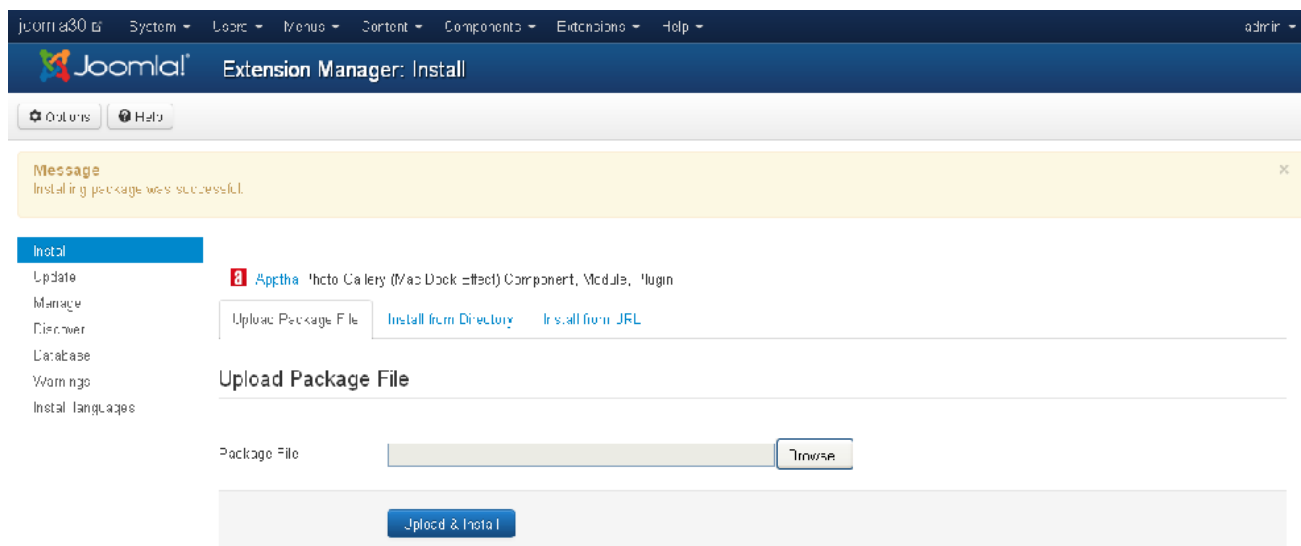

Extensions->Extension Manager->**Upload Package File** and choose the download package **com_macgallery.zip** from desired location and install.

Then you will get a success message in the following format.

You

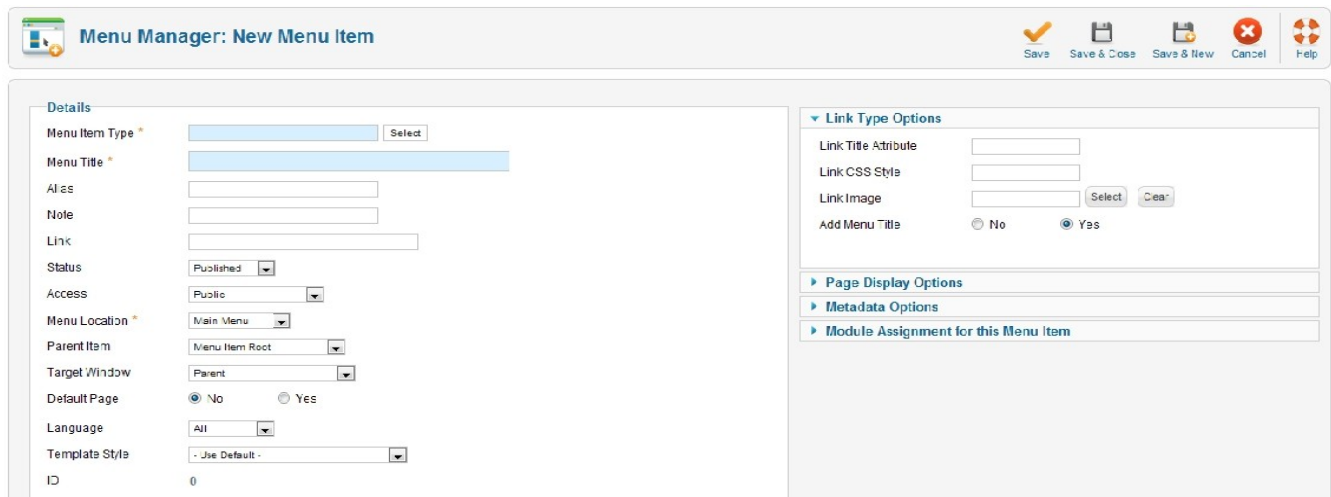

For Joomla 3.0 :

You have successfully installed [Apptha Mac Photo Gallery](#) plugin. Now you will be able to view the page “Photo Gallery” by using the following Instructions.

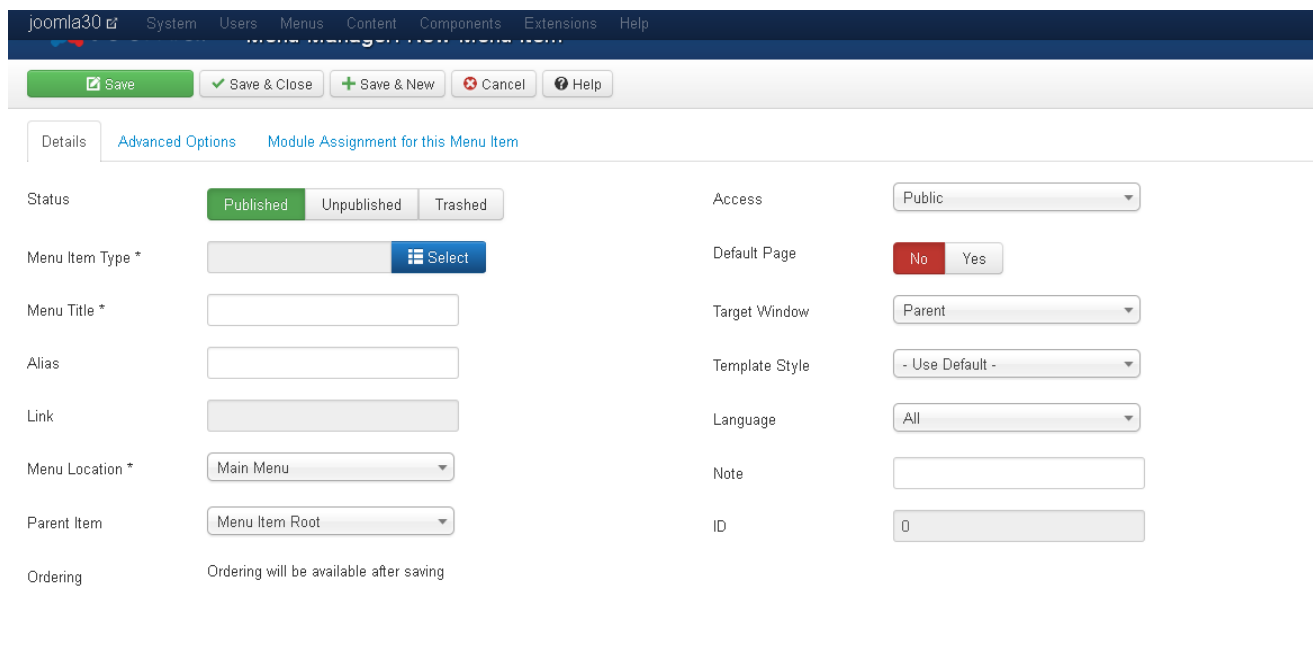

Go to Menus->Main Menu(Active menu based on your site) ->Add New Menu

So you are here now..

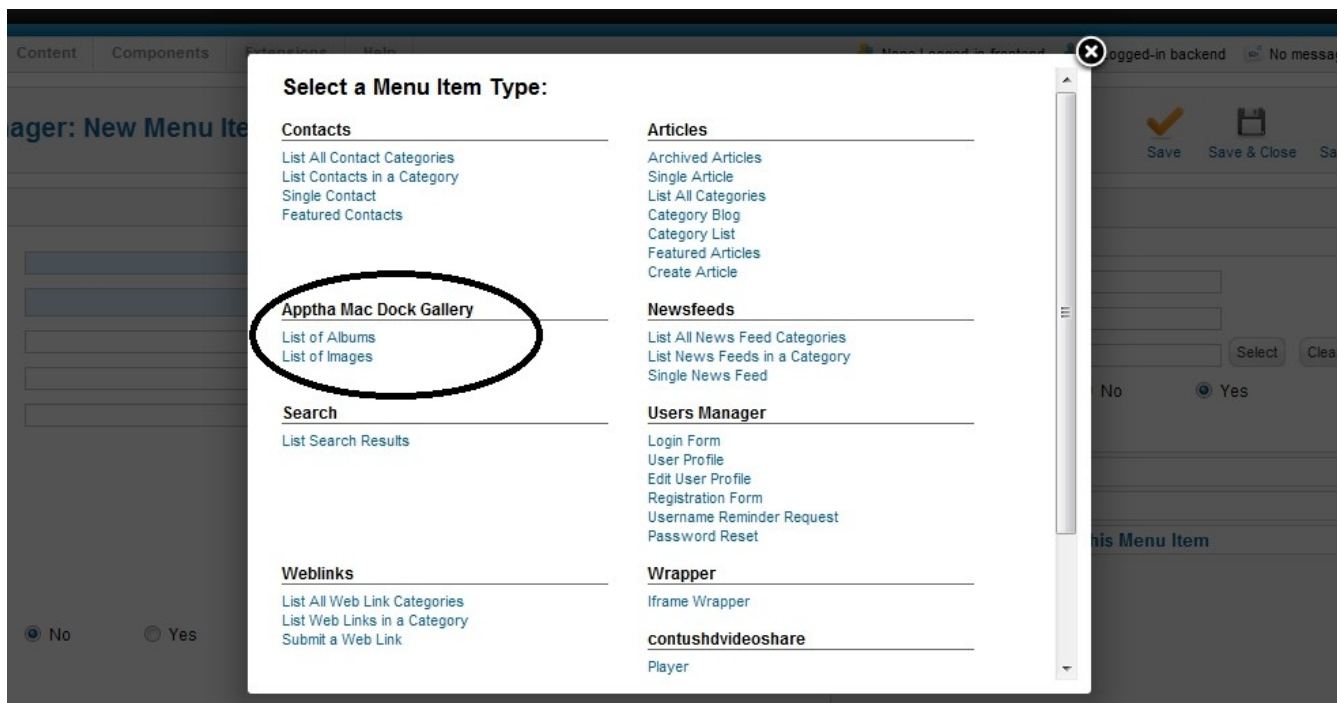

The screenshot shows the Joomla! Menu Manager interface for creating a new menu item. The title bar reads "Menu Manager: New Menu Item". The interface is divided into two main sections: "Details" on the left and "Link Type Options" on the right. The "Details" section contains various fields for configuring the menu item, including "Menu Item Type" (with a "Select" button), "Menu Title", "Alias", "Note", "Link", "Status" (set to "Published"), "Access" (set to "Public"), "Menu Location" (set to "Main Menu"), "Parent Item" (set to "Menu Item Root"), "Target Window" (set to "Parent"), "Default Page" (with "No" selected), "Language" (set to "All"), "Template Style" (set to "Use Default"), and "ID" (set to "0"). The "Link Type Options" section includes fields for "Link Title Attribute", "Link CSS Style", "Link Image" (with a "Select" button), and "Add Menu Title" (with "Yes" selected). Below these are expandable sections for "Page Display Options", "Metadata Options", and "Module Assignment for this Menu Item". At the top right, there are buttons for "Save", "Save & Close", "Save & New", "Cancel", and "Help".

For Joomla 3.0 :

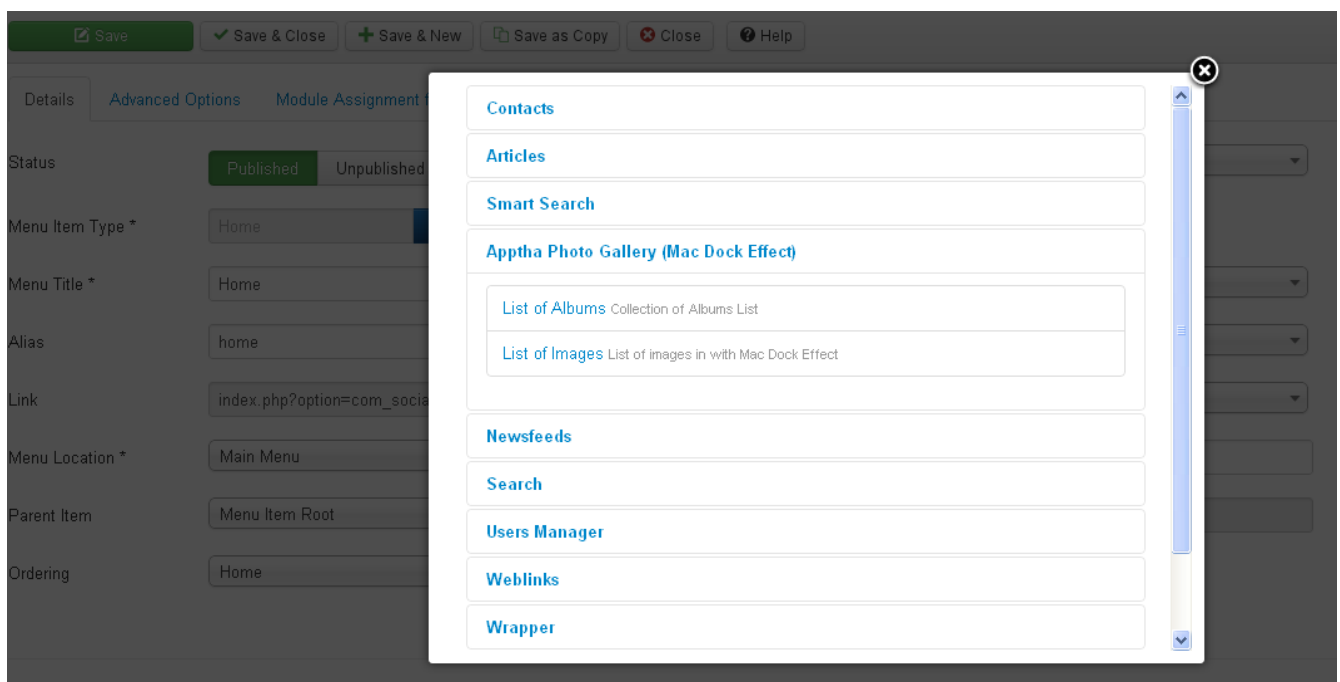

The screenshot shows the Joomla! 3.0 Menu Manager interface. The top navigation bar includes "joomla30" and tabs for "System", "Users", "Menus", "Content", "Components", "Extensions", and "Help". Below the navigation bar is a toolbar with buttons for "Save", "Save & Close", "Save & New", "Cancel", and "Help". The main content area is divided into three tabs: "Details", "Advanced Options", and "Module Assignment for this Menu Item". The "Details" tab is active, showing a form for configuring the menu item. The form includes fields for "Status" (with "Published" selected), "Menu Item Type" (with a "Select" button), "Menu Title", "Alias", "Link", "Menu Location" (set to "Main Menu"), "Parent Item" (set to "Menu Item Root"), "Access" (set to "Public"), "Default Page" (with "No" selected), "Target Window" (set to "Parent"), "Template Style" (set to "Use Default"), "Language" (set to "All"), "Note", and "ID" (set to "0"). At the bottom, there is a note about "Ordering" which will be available after saving.

Click on the select button of “Menu item Type” , so you will get the following appearance.

For joomla 3.0 :

Here you can select the “List of albums” or “List of images”

List of albums:

It will show the total list of albums on front end .

List of Images

It will show the Images of the selected Album. The selection is shown in the

following page..

Here you can see a “Select an album” option . By clicking on that option you will get available albums and select a particular album you need to display.
And also give “Photo Gallery” to “Menu Title” and “Alias” as shown above and save the changes.

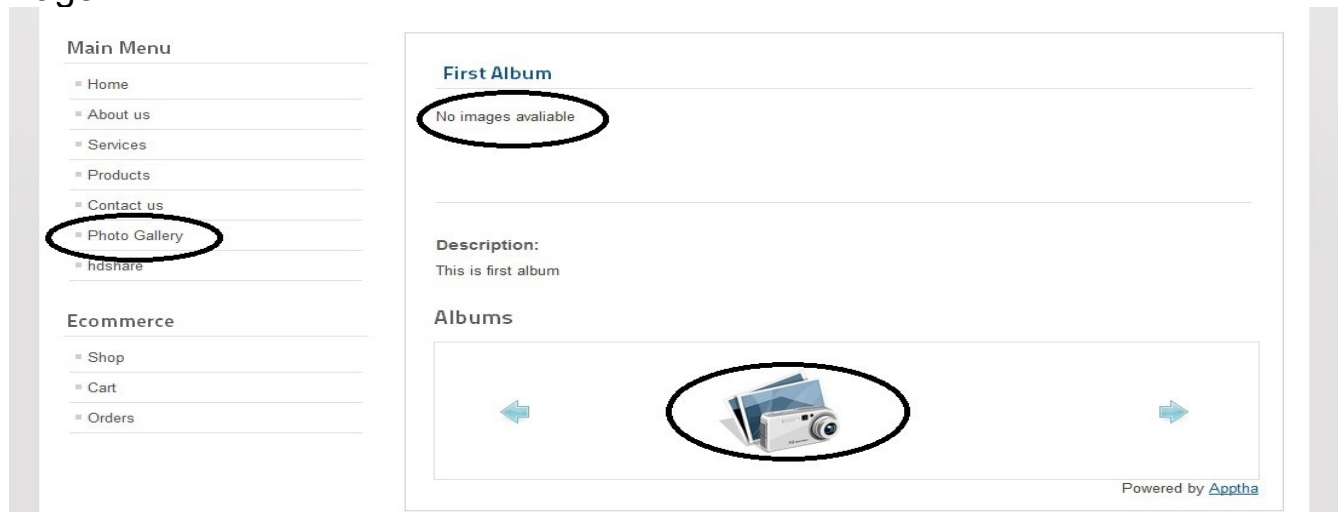

Please check the page in front end, you can see the the menu bar “Photo Gallery” and once click on it, the list of albums displayed there as per the settings available in the Mac doc settings.
Note: If you are using the free plugin, only one album(First Album) will be available on this page.

Page 1:

By clicking on the Album you will get the following page.

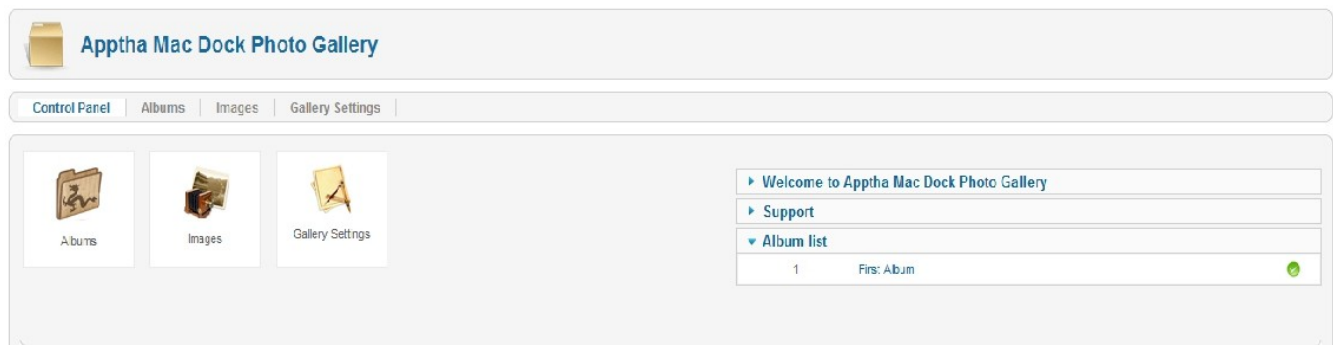

Page 2:

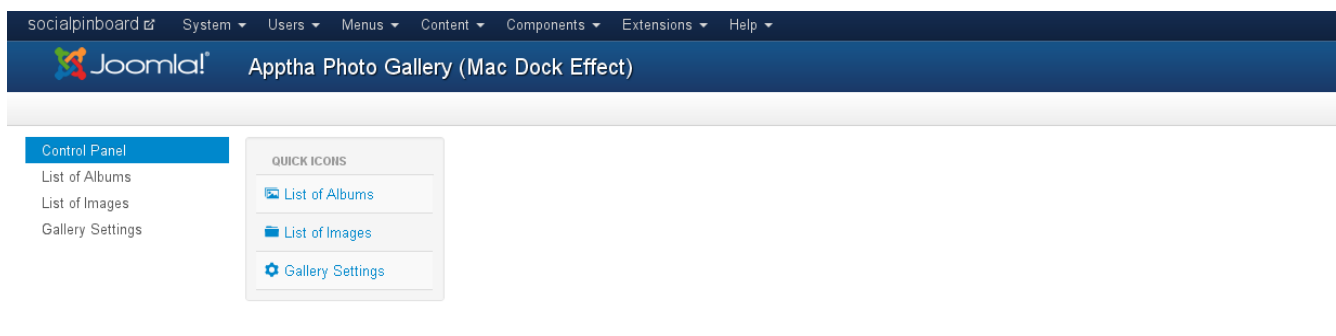

For adding the images for your album,
Go to admin-> Components menu->Apptha Mac Dock Photo Gallery and click on it. So you are here now..

On the right side, you can find a slider which has 3 contents (as

shown below):

For Joomla 3.0 :

Album List: Gives the list of albums in your gallery and also indicates whether it is published or unpublished.

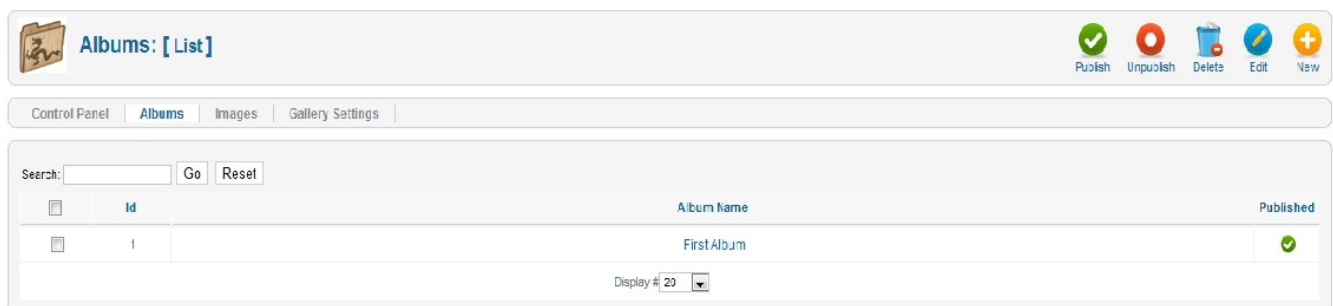

On the left side you will find Three Tabs.

1. Albums
2. Images
3. Gallery Settings

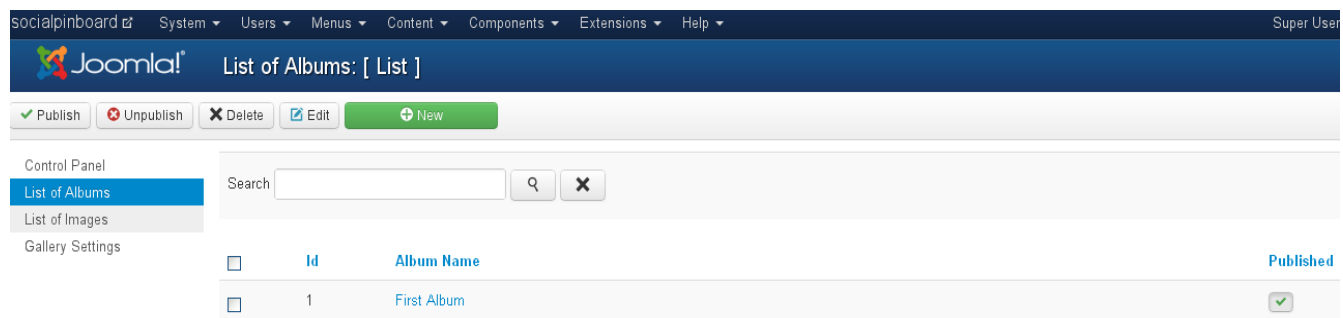

Albums:

Album is a group of photos and here you can manage albums.

By default, the album 'First Album' is included.

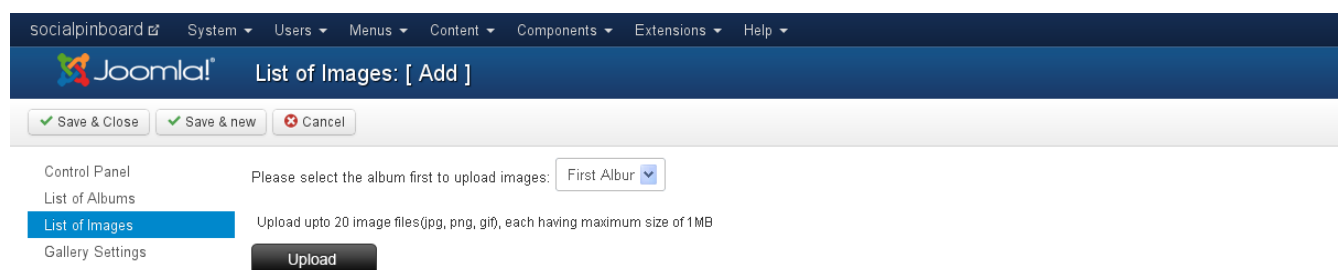

For joomla 3.0 :

Note: All functions are performed by clicking the corresponding buttons (shown below) in the toolbar(Re-Generate Image, Publish, UnPublish, Delete, Edit, New)
For adding new Images Click on 'new' toolbar on right top.
Then you will get the following page..

For joomla 3.0 :

Here you can click on the Upload button and you can upload multiple images in the following way.

Please select the album first to upload images: First Album

Upload upto 20 image files(jpg, png, gif), each having maximum size of 1MB

Kindly check the following details of the explanation for above options.

Rows / Page -Number of rows to be displayed for a page in front end

Images / Row -Number of columns to be displayed a page in a row.

Thumb image height and width(Px) -Preferred height and width of thumb Image in pixels

Mouseover width(Px) -Preferred Mouse Over height and width of thumb Image in pixels

Full image height(Px) -Preferred height of popup full Image in pixels zoom(Px).

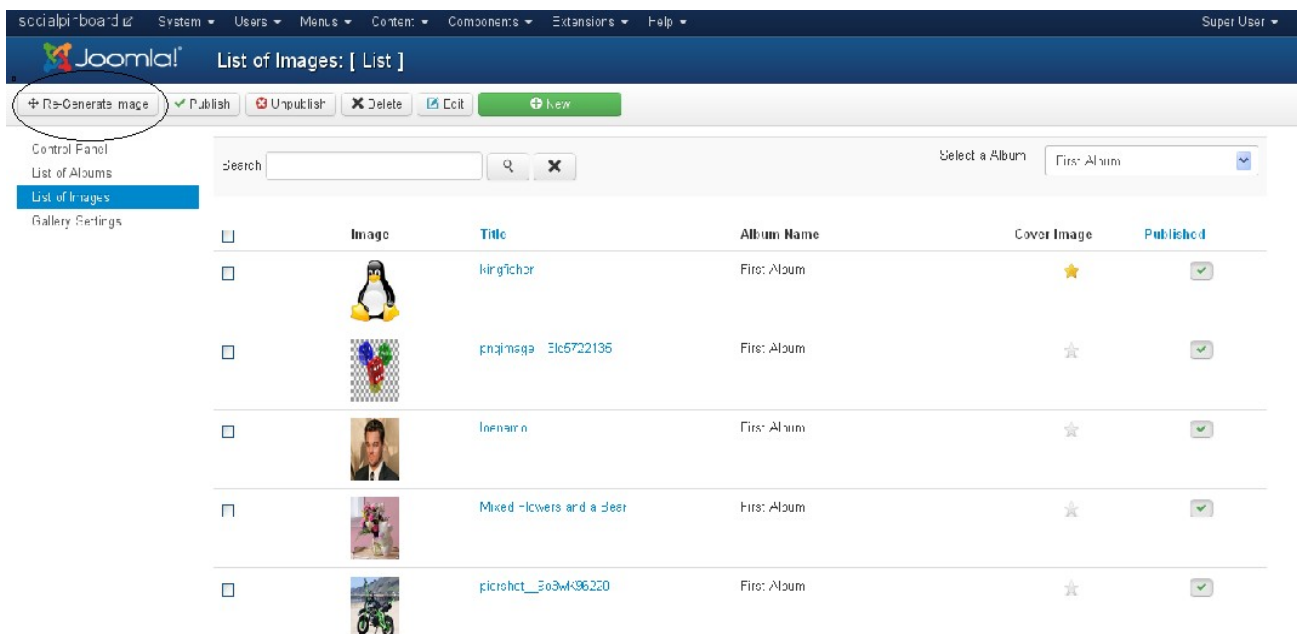

Full image width(Px) -Preferred width of popup full Image in pixels zoom(Px).

Note: This will effect after clicking the “Re-Generate Image” Option on Components->Apptha Mac Dock Photo Gallery->Images Tab on top left

The screenshot shows the Joomla! Administration interface. At the top, there's a navigation bar with 'Administration' and the Joomla! logo. Below it, a menu bar includes 'Site', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. A status bar indicates 'None Logged-in frontend', '1 Logged-in backend', 'No messages', 'View Site', and 'Log out'. The main content area is titled 'Images: [List]'. On the right, there's a toolbar with buttons: 'Re-Generate Image' (circled), 'Publish', 'Unpublish', 'Delete', 'Edit', and 'New'. Below the toolbar, there's a 'Control Panel' with tabs for 'Albums', 'Images', and 'Gallery Settings'. The 'Images' tab is active, showing a search bar, a 'Go' button, a 'Reset' button, and a 'Select a Album' dropdown menu. Below this is a table with columns: 'Image', 'Title', 'Album Name', 'Cover Image', 'Published', and 'ID'. The table contains four rows of image data.

Image	Title	Album Name	Cover Image	Published	ID
	Chrysanthemum	Default			1
	Desert	Default			2
	Hydrangeas	Default			3
	Jellyfish	Default			4

For Joomla 3.0 :

You can Change Thumb image height and width(Px) and Full image height(Px) and process the “**Re-Generate Image**” here.

Proximity - Sets smoothness of Mac Dock Effect of thumb image on mouse hover.

Mac effect direction - The options would be either Top or Bottom. If Select “Top” the mac effect will move towards the Top and If select “Bottom”, the mac effect will move towards the Bottom.

Image display order - Image selection from album to display in front end. The options would be either Random or Order. If Select “Order” the images will display based on created order entered. If select “Random”, images will display randomly.

Display album list in image page - Specifies if you want to display album list in the image page in a slider. By default it is 'Yes'.

Image display style - Specifies which style you want have for your images in front end.

Face Book API Key - Please enter your Face Book API Key(if you don't have Face Book API Key please follow the instructions)

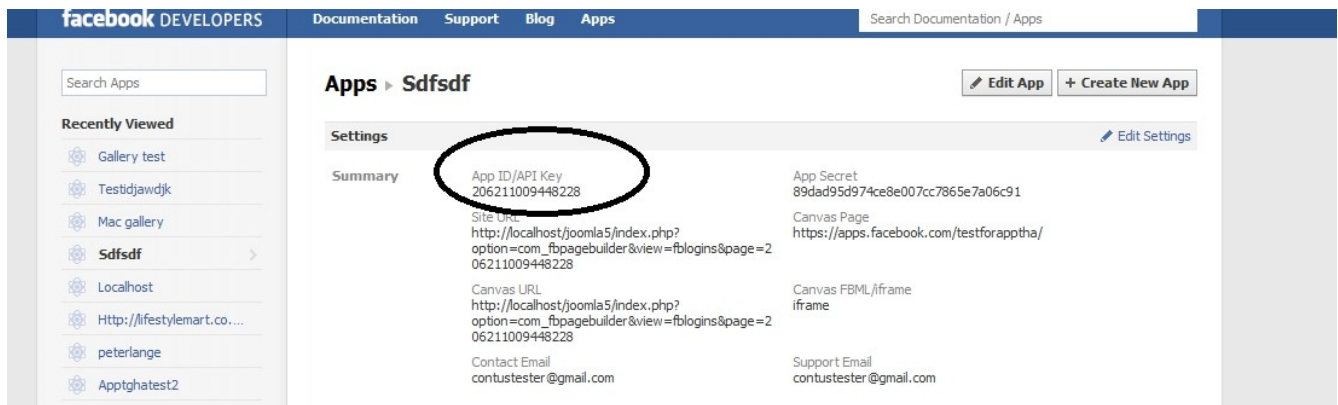

Following instruction will guide you to create an API Key in Facebook:

If you are using Facebook for the first time, then register with Facebook.com

Note: (For first time users) if you have not verified your account, verify your account using mobile phone or credit card.

- Open the page <https://developers.facebook.com/apps> after you logged in.
- Click on the Button “**+Create New App**” found on top of the page.
- After setting up **App Display Name:** & **App Namespace:** you will be redirected to the Facebook app basic page.
- See the tab “**Select how your app integrates with Facebook**” on bottom and click on the tab “**Website**”, Enter your Joomla site. For example “<http://domain.com/>”
- Click on “**App on Facebook** “, place the same URL to the Canvas URL as given above and save the changes.
- Now you have successfully created an app.
- Go to app home page and get the following detail
 - a) Facebook App ID/API Key,

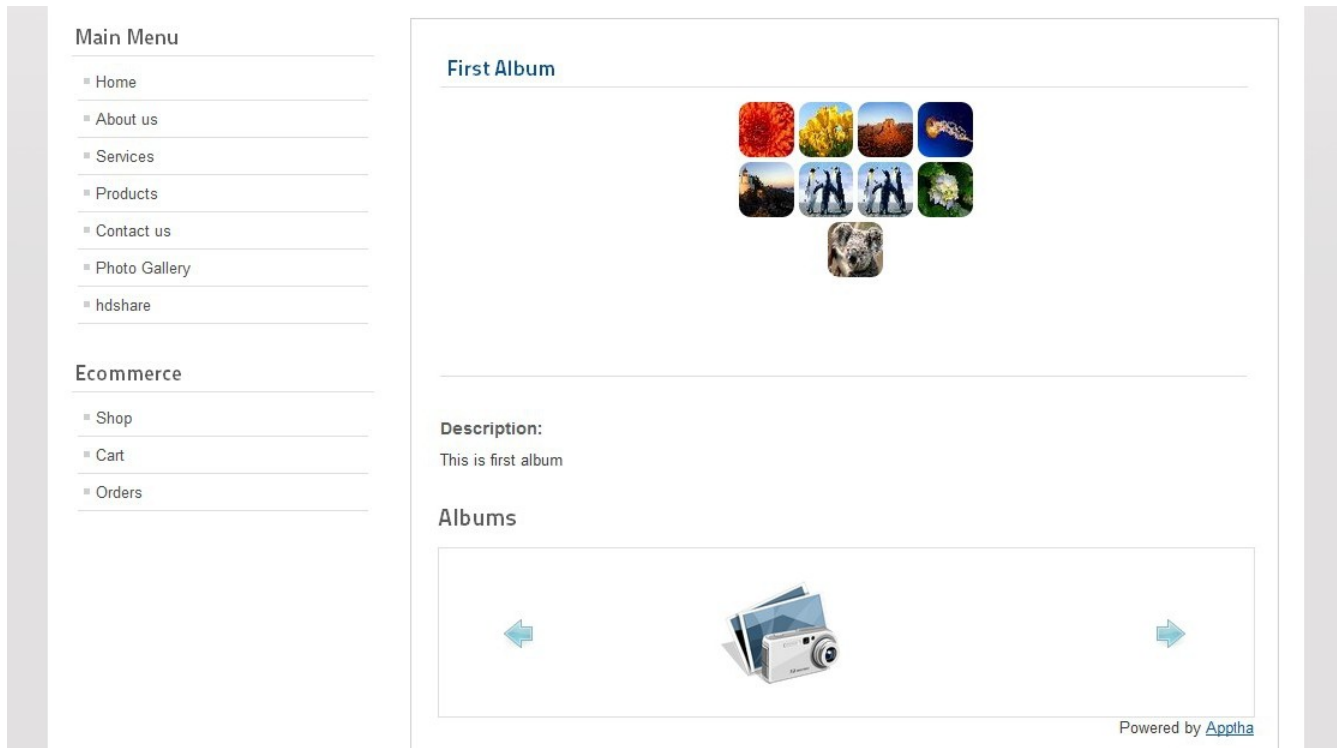

Refer the following screenshot for your reference

Apply Licency Key:

You can click the buy license button for getting your license Key and once applied the “Powered by apptha” will be removed.

After making the changes kindly go to the front end website and you can view the album and images as similar as follows..

By clicking on a particular image it will show one pop-up as shown as follows..And also you can share the album and download image by using the following 'Download' and 'Share' link

-----END OF DOCUMENTATION-----
