Documentation

Here you can find the Wordpress Mac Photo Gallery Documentation table of contents. We are in the process of expanding the features of our product. If you feel this list is missing something critical, please feel free to contact us, so that we can continue to make improvements.

Overview

- 1.1 [Welcome to Wordpress Mac Photo Gallery](#)
- 1.2 [Wordpress Mac Photo Gallery Requirements.](#)
- 1.3 [Installing Wordpress Mac Photo Gallery.](#)

Configure Overview

- 2.1 [Adding Images to Wordpress Mac Photo Gallery.](#)

1.1) Welcome to Wordpress Mac Photo Gallery

Thank you for choosing Wordpress Mac Photo Gallery component for your Wordpress.

One big reason for its success is regular updates and features. Customer satisfaction is our top priority.

We hope you find the process smooth and can then look forward to tailor Wordpress Mac Photo Gallery to your own specific requirements.

This component gives you a new look for viewing your images. We have integrated Mac Dock effect and popup gallery slideshow into this plugin.

What is 'Mac Effect'?

Mac effect gives a classy look to your photos. When the mouse or pointer is rolled over the photos, the photo which is in contact with the pointer gets blown up and brought to the fore whereas the rest of the photos go to the back.

What is Popup Gallery slide show?

The 'Mac effect' plugin embeds Popup Gallery into it. This is a slide show which can either automatically show the next image (after a changeable amount of time) or the user can switch to the next and previous image. The best part of this slide show is that thumbnails are generated and user can enable it if they want to view a particular image.

1.2) Wordpress Mac Gallery Requirements

To successfully install and use Wordpress Mac Photo Gallery you must have a fully operational web server (Apache is the optimum) with Wordpress installed.

Wordpress Mac Photo Gallery has been tested and resulted desirably on many variants within the main three OS for Windows, Linux with Wordpress installed. It might work well on other platforms too.

1.3) Installing Wordpress Mac Photo Gallery

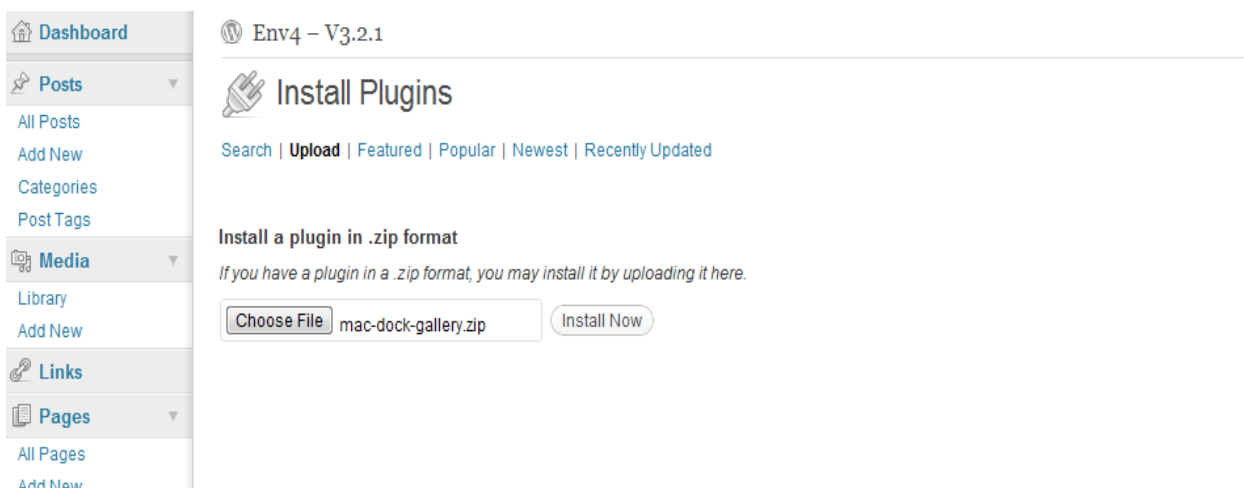

It is very easy to install the downloaded files.

2. Log on to Wordpress Admin page.
3. Go to **Dashboard->Plugins->Add New**, You will reach the following page.

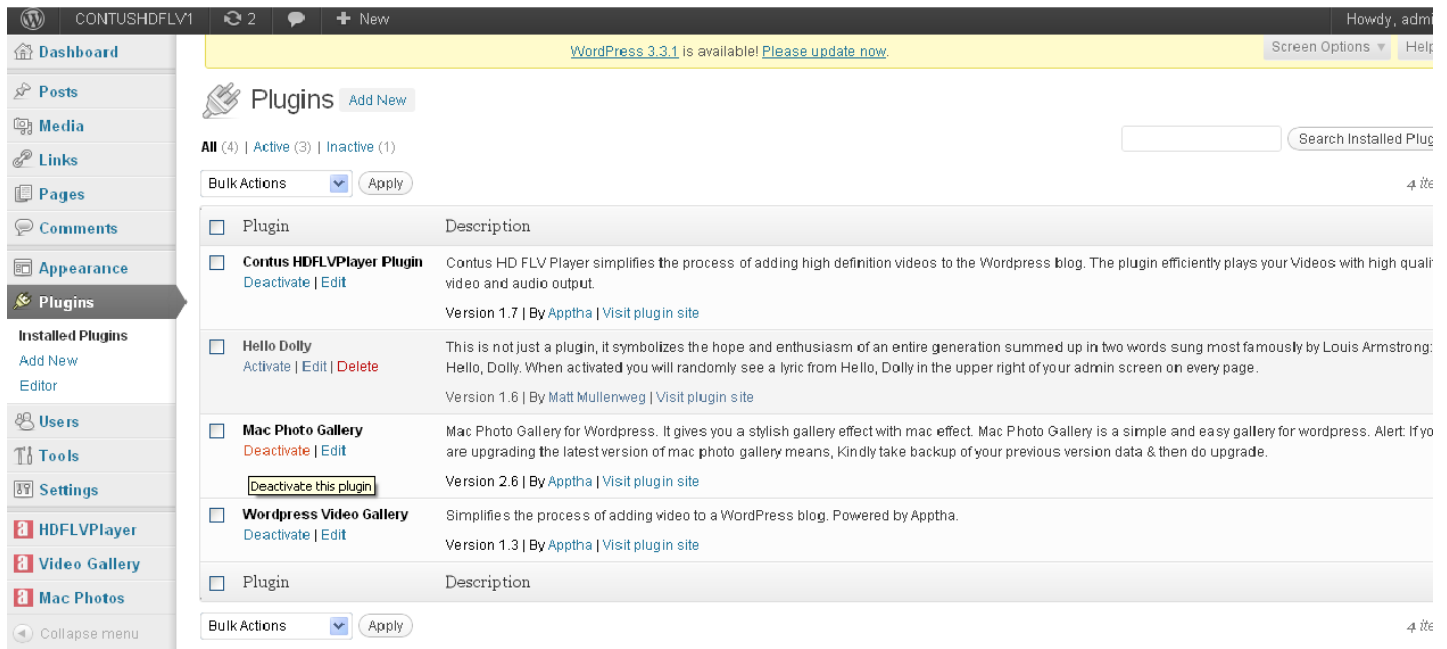

Here you can upload your package or search by using the term “**mac gallery**” in the below section.

If you are using the upload option you will be here (refer below screenshot) while clicking on upload link.

Here you can upload your mac-dock-gallery file. Please check the above Reference.

After clicking the “**Install Now**” Button, The following page will be shown. Click on the above “**Activate Plugin**” Link, so that your plugin will get activated as shown in the image below.

You have successfully installed [WP Mac Photo Gallery](#) plugin. Now you be able to view the page “Photo” created automatically. Please check the page in front end, you can see the list of albums displayed there as per the settings available in the Mac doc settings.

Note: If you are using the free plugin, only one album (First Album) will be available on this page.

2.1) Adding Images to Wordpress Mac Photo Gallery

Click on Mac Photos **[Side menu on bottom]** in the Dashboard.

Here you can able to find four tabs

1. Albums
2. Upload Images
3. Settings
4. Import Albums

1. Albums

Album is a group of photos and here you can manage albums. By default, the album 'First Album' is included.

Here you can find two links on right “**View Images**” and “**Add Images**”. By clicking the “View Images” link you can see the image list and by clicking “Add Images” link you can add images.

Here you can observe that imported from column is represent 4 types of values those are

- a) *Flickr* : If the albums imported from flickr site then it will show
- b) *Picasa* : if the albums imported from picasa site then it will show
- c) *Facebook* : if the albums imported from facebook then this value will display
- d) *User upload* : if you uploaded form your local system then it will display.

One more issue is ACTION

In this action column you can observe two images first one is **view photos** and another is **upload photos**.

Add New Album

Album Name *

The album name is how it appears on your site.

Album Description

The description is for the album.

Update Options

Kindly find the explanations for the above options seen in the screenshot.

Display Settings

Columns - Number of rows to be displayed for a page in front end (Photos menu page)

Rows - Number of images to be displayed in a row. (Photos menu page)

Home Page Columns - Number of rows to be displayed for the home page in front end

(While using the code `[macGallery albid=1 row=3 cols=3]` inside the post content, by default all post contents will display on front end .You can control the number of columns by using this settings and by clicking on the particular post, the columns and rows are controlled by the code itself(`[macGallery albid=1 row=3 cols=3]`))

Home Page Rows - Number of images to be displayed in a row

(Same as the above, we can control the number of rows)

Number of Albums / Page - Here you can limit your number of albums to be displayed on the page. Remaining will come under pagination.

Download settings:

- Download link for single photo on pop up.
- The options would be either "Allow" or "Restrict". If select "**Allow**", download link will display. If select "**Restrict**", download link will not display randomly.

Facebook Share:

- Facebook Share Link for single photo on popup.

The options would be either "**Show**" or "**Hide**". If Select "Show", share link will display. If select "Hide", share link will not display randomly.

Image settings

Mac Dock Image Width/Height(Px) - **Height** of the Mac Dock Image

Mouseover Width/ Height / Row (Px) - Mouse over width/height of the Mac Dock Image

Image Display Style - Display Style of the Mac Dock Image.

Normal, Rounded corner and the Winged display. *Rounded image work only for Chrome Browser.*

Proximity

- Sets smoothness of Mac Dock Effect of thumb image on mouse hover.

Mac Effect Direction

- Here you can select, in which direction your mac effect need to perform. Two options are available: Top and Bottom.

Import Albums

By using below options you can import your **Public** photo albums from Google Picasa, Flickr and Facebook. The imported albums & album photos will be displayed on the site with mac doc effects.

By using below options you can import your photo albums from Google Picasa, Flickr and Facebook. The imported albums & album photos will be displayed on the site with mac doc effects. The download and share options are not applicable for imported photos.

The screenshot displays four settings panels for importing photo albums:

- Picasa Albums Settings:** Includes fields for User (with a profile picture), Gmail Account IDs (with a text input containing 'mr.kranthikumar235' and explanatory text about multiple accounts), and Albums (with an 'Import on' timestamp of 'Thursday 5th of January 2012 08:31:42 PM'). An 'Import Albums' button is at the bottom.
- Flickr Albums Settings:** Includes fields for Flickr API ID/API Key (with an 'API ID' link), Flickr User ID (with a 'User ID' link), and Albums (with an 'import failed on Thursday 5th of January 2012 03:37:37 PM' message). An 'Import Albums' button is at the bottom.
- Facebook Albums Settings:** Includes a 'Login with Facebook' link, App ID/API Key (with input '335481533136428'), App Secret (with input 'bfa859b2f750c57e03f' and a 'Help' link), and Albums (with an 'Imported on' timestamp of 'Thursday 5th of January 2012 08:30:26 PM'). An 'Update' button is at the bottom.
- General Settings:** Includes checkboxes for 'Show Picasa Albums', 'Show Flickr Albums', and 'Show Facebook Albums', each with 'Yes' (selected) and 'No' radio buttons. It also has a 'Timezone' dropdown set to 'Asia/Calcutta' with a 'Help' link and a note 'for get local time & date'. An 'Update' button is at the bottom.

Kindly find the explanations for the above options seen in the screenshot.

Picasa Albums Settings

- User** - It display the user profile photos of your Gmail Accounts.
- Gmail Accounts IDs** - You can give your as well as your friends Gmail Accounts IDs separated by; (semicolon)
Don't use space between account ids and semicolon.
- Albums** - It shows when albums were imported and what the status of albums is.
- It has 3 types of intimation*
- 1) *Not imported (If you haven't imported any albums, it displays message as "Not Imported")*
 - 2) *Imported On Date and Time (It displays the date and time when you have imported the particular album)*
 - 3) *Import failed on Date and Time (if You have tried to import albums with wrong user Ids, it will display message as "Import Failed")*

Picasa Albums Settings

User

Gmail Account IDs

contustester|; mr.kranth

`username1;username2;username3;`
You can give multiple accounts of gmail separated using semicolon. For example your gmail accounts are user1@gmail.com, user2@gmail.com and user3@gmail.com then give user1;user2;user3; as Gmail Account IDs.

Following instruction will guide you to create an API ID in Facebook:

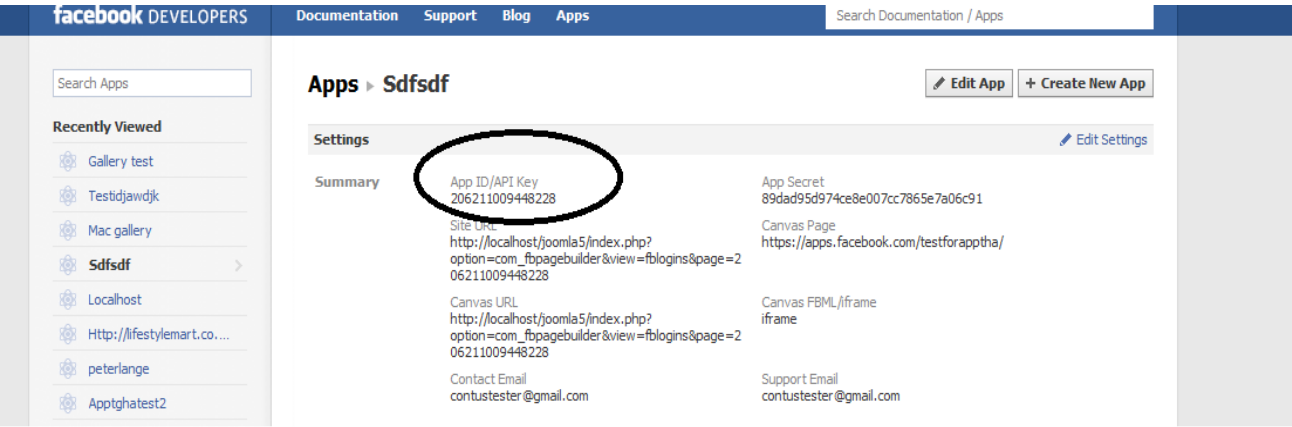

If you are using Facebook for the first time, then register with Facebook.com

Note: (For first time users) if you have not verified your account, verify your account using mobile phone or credit card.

- Open the page <https://developers.facebook.com/apps> after you logged in.
- Click on the Button “+Create New App” found on top of the page.
- After setting up **App Display Name:** & **App Namespace:** you will be redirected to the Facebook app basic page.
- See the tab “**Select how your app integrates with Facebook**” on bottom and click on the tab “**Website**”, Enter your Joomla site. For example “<http://domain.com/>”
- Click on “**App on Facebook** “, place the same URL to the Canvas URL as given above and save the changes.
- Now you have successfully created an app.
- Go to app home page and get the following detail

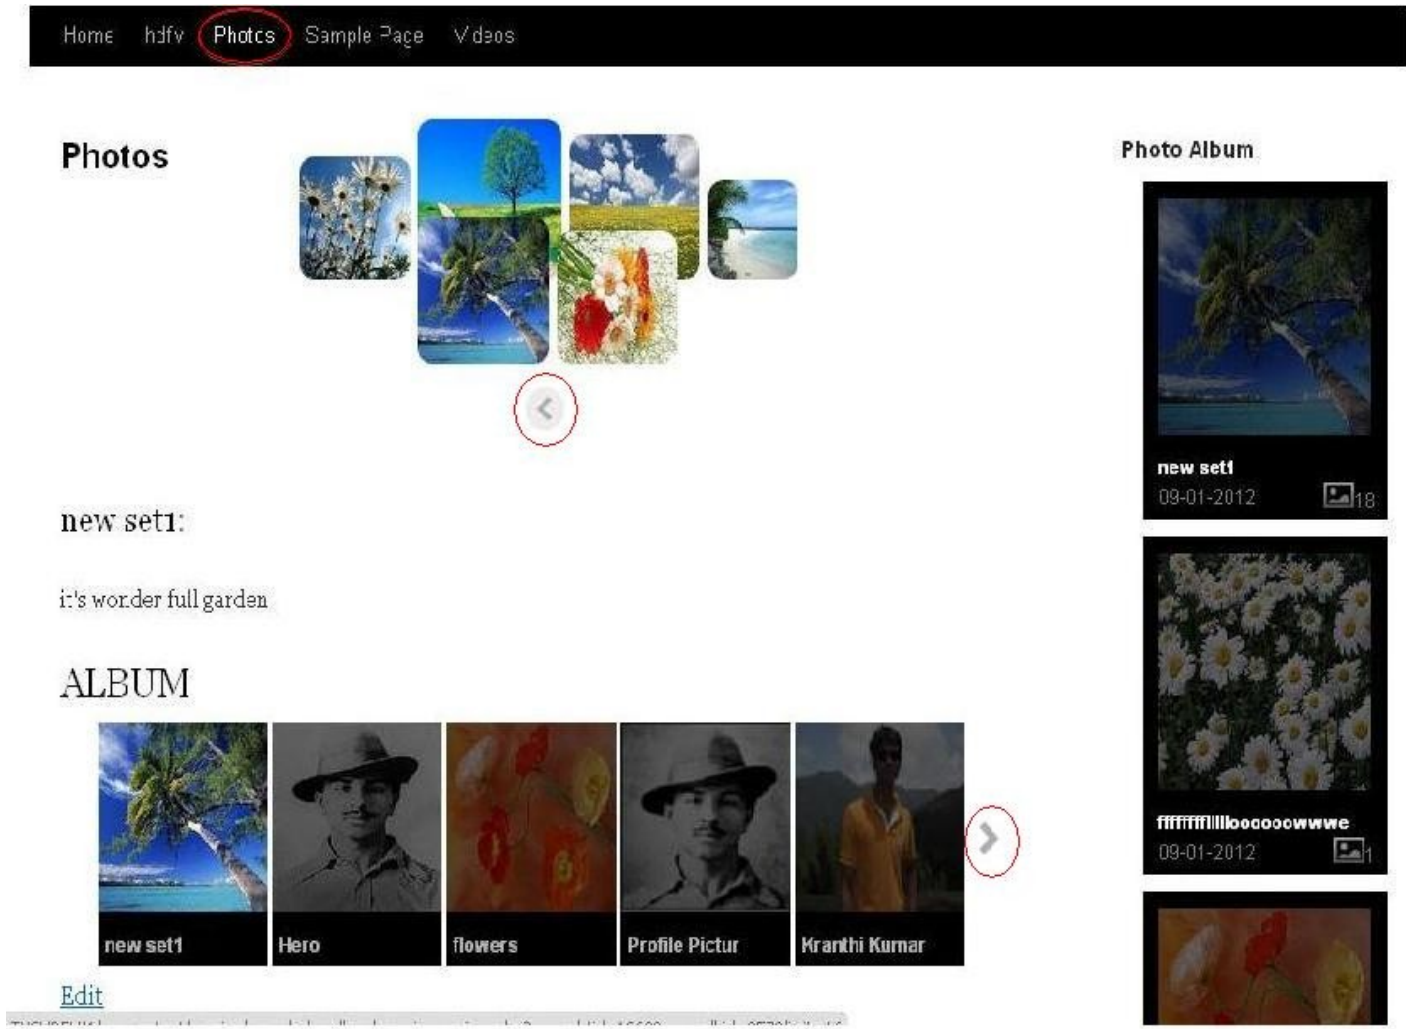

a) Facebook App ID/API Key,

Refer the following screenshot for your reference

Apply License Key:

You can click the buy license button for getting your license Key and once applied you can add albums as your wish. After making you changes kindly go to the front end website to view the album and images like seen in the below screenshot

Photos : It is mac-dock-gallery plugin page in this page you can view the photos of selected album , albums as slide show and photo Album widget .

It is the left pagination arrow if it show the previous photos.

It is the album slide show arrow it allow you show remaining albums in slide show.

By clicking on a particular image it will show one pop-up as shown as follows. And also you can share the album and download image by using the following '**Download**' and '**Share**' link

A group of seven men sitting on a stage in front of a large banner that reads "new year" and "CONTUS SUPPORT INTERACTIVE". They are all raising their right fists in a celebratory gesture. The banner also features logos for "apptiba", "Web-TV Recorder", and "eCommerce".
